

# FIREPLACE MEASUREMENT WORKSHEET

DeVinci has always been dedicated to providing our customers with high quality cast stone fireplaces. The first step to insuring a perfect fit for your new fireplace is knowing the layout of your firebox. This measurement worksheet is designed to aid our customers in selecting the perfect DeVinci fireplace. Please add any measurements or photos that you think may help us in designing a perfect fit fireplace for your home.

## CHECKLIST:

- Measure firebox opening. The firebox opening is the area that is not covered by a mantle or surround. Please measure outside of all vents and access panels, these should not be covered. (filler panels can be added to meet specific requirements)
- Measure distance from floor to bottom of firebox opening.
- Measure space on each side of firebox opening - note any cabinets or other limitations.
- Locate the gas valve in relation to firebox opening. Gas valve may need to be moved if it can not be adapted to surround design.
- Locate all electrical switches, outlets and/or whips. If a J-box is to be built in the mantle, please provide locations and quantity.
- Verify type and thickness of finished floor. The fireplace should be placed directly on the concrete slab. If your existing wooden flooring needs to be cut for the proper installation of a new stone hearth, we can provide a template for this purpose after our pre assembly process is complete.
- Please note any special conditions which may affect delivery or installation. Our installation price is based on a normal one story install. Stairs and steep grade changes drastically affect the installation process and should be discussed with our sales department.
- Please note any glass doors that may be attached to your firebox. Glass doors require additional clearance.

Please fill in all the blanks on page 1. Page 2 is designed to give you a sketch pad to add any special conditions or measurements that will insure a perfect fit fireplace. The completed measurement sheets and photos can be faxed to 405-680-5614 or sent via. e-mail to "mail@structstone.com".

**If you have any questions please feel free to call our office and a DeVinci fireplace specialist will assist you.**
